The importance of notifying

It is important to remember that some benefits require notification, regardless of the policy you have. When you contact USA Medical Services to notify, you receive:

1. **Assistance** in understanding and coordinating your benefits with direct 24-hour access to our team of professional personnel.
2. **Support** from our staff offering guidance to you or your family for the best possible medical care and services: top rated hospitals, reputable physicians and community resources.
3. **Access** to qualified representatives with extensive experience in the industry to help you avoid or reduce unnecessary medical expenses and overcharges.
4. By notifying us, we can provide the **best** possible care management before, during and after your treatment or service.

Before

Our staff begins handling the case by communicating directly with the patient's doctor and medical facility. As soon as we receive all the necessary information from your provider, including medical records, we will coordinate direct payment and confirm your benefits. This is how we guarantee our customers a smooth admission to the hospital without worrying about payments or reimbursement. Additionally, we are here to coordinate and schedule air ambulances and second surgical and medical opinions.

During

During treatment and/or hospitalization, our professional staff continues to monitor the patient by communicating frequently with the doctor and hospital staff, and following up on needed treatments, progress and outcomes. We can also provide information and support to your family about the latest medical advances and treatments. Members of our staff visit patients, contact families to provide assistance, answer questions, and ensure that the patient is receiving the best quality service.

After

Following the patient's treatment or discharge from the hospital, our professional staff will coordinate any follow-up treatment or therapy, and will make the necessary arrangements until the payment of the claim is completed.
